YATOUJI AYOUB

SEO Specialist & AI Automation

ayoubyatoujii@gmail.com | +216 54 123 866 | Ariana, Tunisia | linkedin.com/in/ayoub-yatouji

PROFILE

SEO and AI automation specialist, I designed and deployed an SEO strategy and automation system based on 16 n8n workflows (OVH VPS/Docker) along with a Python tool connected to the Google Search Console API, generating +30.6% organic clicks and +27.7% impressions within one month on kenzastihl.com (final-year project). Skills spanning the full SEO chain: keyword research, SEO strategy, content marketing, link building, technical audit, and performance analysis via Google Analytics. Trained in marketing, digital commerce, and customer relationship management, I combine strategic vision, data/AI tool proficiency, and operational rigor. I am seeking a role in SEO, growth marketing, or digital automation where I can put these skills to work driving measurable growth.

PROFESSIONAL EXPERIENCE

SEO Intern — AI Automation (Final-Year Project), *E2B Consulting & Training* 06/2025 – 06/2026 — Tunis

- Designed and executed the SEO strategy for kenzastihl.com including keyword research, technical audit, link building, and content marketing; developed kenza-seo-tool (a Python tool connected to the Google Search Console API), cutting monthly report generation time from 3-4 hours to under 2 minutes (-95%).
- Led the SEO strategy and automated content production, generating +30.6% organic clicks and +27.7% impressions within one month, with average ranking position improved from 9.9 to 8.7; tracked performance via Google Analytics and Google Search Console.
- Cut product-sheet writing time by 85% (from 45-60 min to 5-10 min) using a dedicated AI skill, and conducted regular technical SEO audits (Screaming Frog, GSC, Ahrefs) including competitive analysis and conversion optimization. Automation project details in the Projects section.

Intern — Customer Relations & CRM, *BIAT* 07/2023 – 08/2023 — Tunisia

- Managed customer relations (CRM), customer service, and objection handling in a banking context. E-banking project details in the Projects section.

PROJECTS

SEO Automation — kenzastihl.com (Final-Year Project) 02/2026 – 04/2026

- Design and deployment of an AI agent applied to kenzastihl.com to automate SEO tasks (technical audit, keyword research, rank tracking, reporting) via 16 n8n workflows on an OVH VPS/Docker. Results: +30.6% organic clicks, +27.7% impressions, average ranking position improved from 9.9 to 8.7.

E-Banking Services Improvement — BIAT 07/2023 – 08/2023

- Year-end internship project supervised by Ms. Fatma Lajmi: user needs analysis, information security, and mobile application development.

Calorie Manager 08/2023 – 06/2024

- Designed an Excel tool to track daily caloric intake to help users reach their nutritional goals.
